

TECHNICAL DATA

Suspended cage for cranes, model CG900, designed for man-riding as well as material lifting. It has been designed to comply with EN14502 standard.

Ideal for **rescue operations with horizontal stretchers**.
Optional: rescue stretcher Accessus CR30.

Apt to **3 people**.

CG900 model is made of 3 modules for 3 people. It can be converted into 3 units of CG300 cradle (1 module each - 2 people each cradle) & CG600 cradle (2 modules - 5 people) by adding some extra pieces.

The basket is made of steel painted components, its construction is modular. For safety reasons all joints are bolted.

Detachable in pieces (passes into Ø1.200 mm manholes).

Its modular and detachable design facilitate and optimize the transport and storage.

All man basket for cranes are equipped with anchoring points certified under the EN 795 standard for each of the users.

Accessus cages for cranes CG900 have access doors with an automatic locking and blocking system, banisters and a protection plinth, interior handrail to avoid trappings, anti-slipping floor, and protection ceiling. Includes steel slings, shackles & lifteye.

Crane baskets Accessus CG900 are supplied with instructions manual and certificate, with loads and identification product nameplates incorporated.

CG900

3 people

x 3 modules
