

LEVA CARRYING BOX 020064

TECHNICAL INFORMATION

The **LEVA lift box** is designed to specifically transport and store the LEVA type motor.

It acts as a protective shield against external elements such as abrasive particles, dust, scratches... thus extending its useful life and reducing its maintenance.

It consists of a steel base and cover.

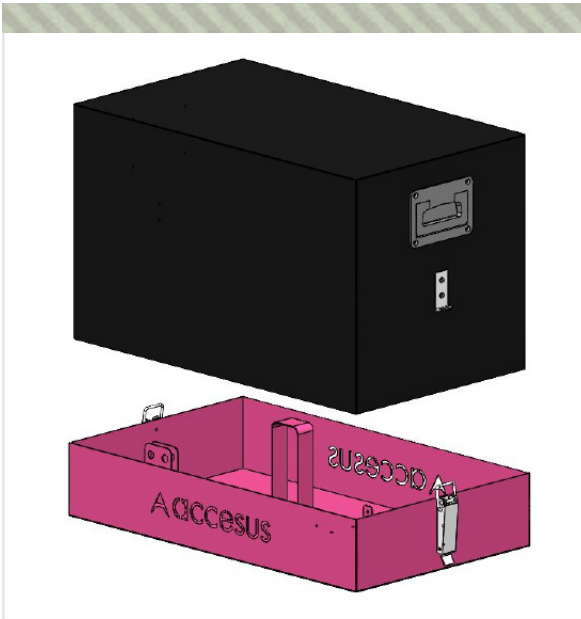

It also has two latches and two handles on both sides for easy loading and transport of the engine.

COMPATIBLE WITH:

- LEVA 500
- LEVA 501
- LEVA 502
